EXPERIENCE

HubSpot

Remote

Senior Software Engineer | October 2024 - Present

- Led large-scale frontend migration across 5 repositories, implementing a design token system that standardized styling for 1,000+ components and unlocked theme scalability across the product.
- DRI on the Activity Index Page, a unified table view surfacing HubSpot's 4 most-used engagement types; adopted by 40% of customers within the first quarter of launch.
- Architected backend-rendered event templates using Jinja, cutting timeline render time by 35% and significantly improving perceived performance for high-volume CRM accounts.
- Drove deprecation of the legacy timeline by building a comprehensive suite of acceptance tests, closing feature parity gaps, and shipping fixes based on direct customer feedback.
- Leverage AI tooling daily (Cursor, Claude Code, Conductor) to accelerate feature development, automate refactors, and orchestrate multi-agent coding workflows across large codebases.
- Resolve 5+ internal and external escalations per on-call rotation as a core member of the Events Platform team.

Alteryx

Remote

Software Engineer (Full-time & Intern) | July 2023 - June 2024 | May 2022 - Aug 2022

- Built RESTful API endpoints within a microservice architecture, supporting scalable backend services for the Alteryx Analytics Cloud.
- Developed responsive, dynamic UIs with React and Redux, and authored unit, integration, and end-to-end test suites (Jest, Mocha, TestCafe) to harden release stability.
- Designed interactive in-product onboarding guides with WalkMe, reducing new-user friction and support ticket volume.
- Contributed to sprint planning, estimation, and prioritization using Jira in a fast-moving agile environment.

PROJECTS

Image Genius - SaaS Application | imagegeni.us

- Full-stack AI image editing SaaS built with Next.js, TypeScript, Tailwind, MongoDB, Clerk, and Stripe; integrates Cloudinary's AI APIs with a credit-based monetization system.

CEO Inc - Contracted Project | ceoinc.com

- Designed, built, and deployed a greenfield single-page application using React and Node.js, shipped to production via AWS CloudFront and S3.

YOUiversity - Hackathon Winner | SwampHacks 2022

- Built and deployed a university data filtering tool in Python and Streamlit using the USDOE dataset; won the Domain.com challenge.

SKILLS

AI Tooling: Cursor, Claude Code, Conductor, Claude API, GitHub Copilot, prompt engineering, multi-agent workflows

Languages: TypeScript, JavaScript, Python, Java, C/C++, C#, SQL, HTML/CSS

Frameworks & Libraries: React, Redux, Next.js, Node.js, Jinja, Tailwind, Keras, PyTorch, scikit-learn

Infrastructure & Tooling: AWS (S3, CloudFront), MongoDB, SQL, Git, Jenkins, GitLab CI/CD, Jira

Testing: Jest, Mocha, TestCafe, Selenium, unit / integration / end-to-end

EDUCATION

University of Florida - B.S. Computer Science, Minor in Mathematics

May 2023

Gainesville, FL | Cum Laude
